

## RESCUE OUR FUTURE FOUNDATION

We find ourselves in times that urgently require global actions to rescue our future. *Quest to Rescue Our Future* offers a well-documented diagnosis and analysis of the tortuous historical path of humanity with thought-provoking reflections that invite to reconnect to the driving force of evolution. Beyond a wake-up call, it inspires the hope that a massive mobilization of the moral reserves of humanity can still allow us to take our future in our own hands. A system of global ethics and concerted diversity along the lines of a cosmopolitan, communitarian, participatory and ecologically-balanced undertaking opens the avenue wide for a re-humanization of humanity. The redeeming force to rescue our future is within reach and closer than we could ever dream. It is ‘We’.
